Stanley Cools Modal - Mid Heather Grey
Stella Sparkles Modal - White

Funky spring
Bright summer
Sparkling collection.

Copyright © Stanley & Stella SA - All rights reserved

Collection 2016.

Each year is a new challenge !

We bring you the cream of the cream of trends, developed in our own way and revisited to offer you the best in terms of styles, shapes, fabrics and colours.

24 new shades to pulse your own collection or communication.

From very funky tones to special heather colours, you will be seduced by the new colour palette.

A new assortment of **3 glitter** shades will give another dimension and make your brand sparkle.

A new jacket range is here, offering **2 windbreakers** for men and women.

Similarly, we introduce **2 scarves** to accessorize your outfits.

Discover our new **pocket style** and very bright new styles. You'll make the difference by adopting them !

The collection of 2016 totals a number of **119 colours and 133 styles** available to help you create indefinite combinations.

Be ready to explore the Stanley & Stella's world of 2016

Stella Sparkles Linen
Linen Grey

Jacket Collection.

In the wind of change ...

Not too cold, not too hot. It's hard to find what to wear. The windbreaker of Stanley & Stella is the perfect 'in-between' solution. Durable Water Repellent, windproof and made of 100% recycled Polyester; this light jacket with a hood can be worn in many different situations. Designed for women and men, it is available in 7 colours.

Glitter Collection.

It wouldn't be a party without Sparkle !

These new glittery colours bring a whole new dimension to our products and collection.

Want to combine comfort without forgoing elegance, this is the perfect style to adopt. The trick is to rock glitters in a casual-glam way that looks effortlessly chic.

Pocket Style.

It's in the pocket !

It shouldn't be surprising that an apparel that started out as underwear and a staple for little boys, has retained something of its juvenile feel and notoriety as the most casual of clothing.

Today Stanley and Stella wants to change it's classic reputation by designing the 'pocket style'.

The pocket Style gives a relaxing aspect to the products. It adds a certain definition and a nice touch to the shape. We make the pocket style even more interesting and attractive with different pocket fabrics and shades.

We have also decided to enlarge this new feature to our Tees, polos and even shirts.

Accessories.

Let's Wrap yourselves.

In 2016, we are launching a new category of accessories.

This range starts with 2 type of scarves.

Perfect items for mid season and to face the breeze of summer, one is made from 100% linen and the other of 100% cotton poplin.

Light scarves really are the best accessory for spring and summer clothing !

SUSTAINABLE

Our Raw Materials.

All our fabrics have been chosen with consideration for their contemporary style and their role as a printing medium. But not only. Each of the raw material that we use has also been chosen for their eco-friendly features. Our apparel is therefore made of 100% certified pure organic cotton or blended with fabrics like Tencel® or Modal.

100% certified organic ring-spun combed cotton

All our fabrics have been chosen with consideration for their contemporary style and their role as a printing medium. Stanley & Stella only work with eco-friendly materials. Our apparel is therefore made of 100% certified pure organic cotton or blended with fabrics like Tencel® or Modal.

Organic Cotton production improves soil fertility and biodiversity, thanks to diversified crop rotation and non-use of GMOs. Only natural fertilizers and pesticides are used, so groundwater and rivers are kept free of chemicals. At the same time, water irrigation is better controlled.

All of Stanley & Stella's organic cotton is certified with the globally recognized GOTS standards. As a premium brand, we want to offer you the best. Which is why we choose to only use ring-spun combed cotton. Ring-spun fabric is softer and offers a plain, uniform surface which facilitates the best results from every kind of printing. In addition, the process of combing cotton includes special treatment of the cotton fibres during spinning that cleans them of all dirt, impurities and short fibres. This resulting fabric is comprised only of the longest fibres, making it stronger, longer-lasting. 100% biodegradable.

Tencel® Lyocell

Tencel® Lyocell, to give it its full name, is the most environmentally friendly man-made cellulosic fibre available today. It is produced exclusively from the wood pulp of Eucalyptus trees, which are sustainably grown on farms.

Tencel® Lyocell is fashionable, stylish and well-known for its outstanding physical characteristics, being silky soft with a soft-flowing, luxurious drape. It is perfectly smooth, has superb depth of colour, excellent moisture absorbency and is naturally hygienic as it inhibits the growth of bacteria.

Tencel® Lyocell, the eco fibre, makes it possible to create truly environmentally friendly products. Blending this with organically grown cotton, instead of conventionally grown cotton, gives consumers the opportunity to experience textiles made entirely of ecologically responsible fibres. 100% biodegradable.

Lenzing® Modal

The Softer Botanic Fibre. Modal is a man-made regenerated cellulosic fibre made from sustainably cultivated forest plantations of beech wood trees transformed into pulp and fibre through the unique Edelweiss technology, based on oxygen-based chemistry. Lenzing Modal is the only sustainable Modal in the world today. Lenzing Modal is the perfect fibre for fabrics worn next to the skin – for day and night, active and relaxation activities. Same as for the Tencel, the botanic principle means that more trees are planted that convert carbon dioxide and water into wood and pure oxygen via photosynthesis. 100% biodegradable.

100% Linen

Skin Microclimate Fibre. Linen is a natural cellulosic fibre from the flax plant, wanted by most high-end stylists because it has exceptional coolness and freshness in hot weather and unrivalled ventilated comfort. Fabric with natural thick/thin/Slub character giving a textured feel, which is considered as part of the linen fabric's particular charm. Produced without waste, and using less energy, less water, linen does not harm nature.

Wool

We have decided to mix Cotton and Wool, to have the warmth of the wool and the softness and comfort of the cotton. This gives a real winter product while keeping the sustainability and the premium quality of the styles. The fabric is soft, really comfortable to wear and warm for the winter season. It also gives a "casual chic" look.

Recycled PET

Developing continuously better and ecofriendly fabrics, we are introducing Recycled Polyester in our collection. The certified recycled polyester yarns come from recycled PET bottles. By recycling the PET bottles, we provide a second life to a waste material with the purpose to offer premium quality products.

Our Commitment.

Fair Wear Foundation

Fair Wear Foundation (FWF) is an independent, nonprofit organisation that works with companies and factories to improve labour conditions for textile and garment workers.

FWF keeps track of the improvements made by the companies it works with. And through sharing expertise, social dialogue and strengthening industrial relations, FWF increases the effectiveness of the efforts made by companies.

GOTS / OCS Blended / OCS 100

Global Organic Textile Standard (GOTS) is recognised as the world's leading processing standard for textiles made from organic fibres. It defines high-level environmental criteria along the entire organic textiles supply chain, including restricting the use of chemical substances and requiring compliance with social criteria.

OCS Blended applies to all goods that contain a mix of organic cotton and any other material. The OCS 100 tracks the purchase, handling and use of 100% certified organic cotton fibres in yarns, fabrics and finished goods through the use of transaction certificates for factories that don't yet comply to the GOTS standard.

OEKO-TEX® [confidence in textiles]

OEKO-TEX® Standard 100 Class II is a globally uniform testing and certification system applying to raw materials used in textiles, intermediate and end products, at all stages of production.

This certification covers multiple human-ecological attributes, including harmful substances which are prohibited or regulated by law, chemicals which are known to be harmful to health, but are not officially forbidden, and parameters which are included as a precautionary measure to safeguard health. Textile products may be certified according to OEKO-TEX® Standard 100 only if all components meet the required criteria without exception.

The two windbreakers and the scarf Wrap are not certified as OEKO-Tex®

REACH Compliant

The aim of REACH is to improve protection of human health and the environment through better and earlier identification of the intrinsic properties of chemical substances and through strict use of permitted substances.

Canopy

Canopy is an award winning environmental not-for-profit organization dedicated to protecting the world's forests, species and climate.

Canopy works to protect the world's forests, species and climate by collaborating with business and the public to help create sustainable supply chains and innovative solutions to environmental challenges.

For the Modal and Tencel fibres, in June 2014 St&St decided to join – with 10 pioneer brands – the Canopy Project to protect endangered forests.

Colour your world.

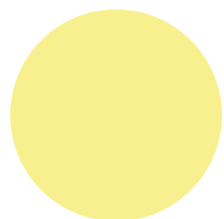

Our Spring Summer Collection 2016 will feature a mix of funky, bright and sparkling shades to make your brand shine out!

24 new shades added. From edgy denim to seasonal funky tones, through to more than **10 new heather colours**: we are also launching a new 'glitter-sphere'. Indeed, the **3 glitter tones** add a little sparkle to our styles and give a serious dose of glamour.

This year, our collection totals a number of **119 colours** available to help you create indefinite combinations and possibilities.

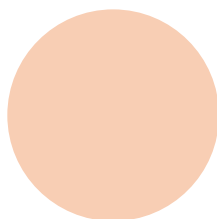

The colours are the closest possible to the reality but might be slightly different according to the fabric.
